"Breaking Barriers: VET for NAI Unlocks New Tools for Immigrant Integration"

The VET for NAI project, funded by Erasmus+, proudly announces the completion of two groundbreaking tools—Project Result 2 (PR2) and Project Result 3 (PR3)—paving the way for innovative support in the integration of newly arrived immigrants into the European labour market.

PR2: A Game-Changing Toolkit for Career Guidance

Developed by DIMITRA Education & Consulting, this interactive toolkit is a first-of-its-kind resource designed for career guidance professionals. It includes a sector-specific digital card game and a career guidance quiz, blending serious gaming with practical insights. These tools are not just informative but engaging, providing newcomers with an exciting pathway to understand and navigate the complexities of the job market.

PR3: Training the Trainers with a Twist

In partnership with Trim Tab AB, PR3 brings a dynamic curriculum to life, equipping guidance professionals with state-of-the-art techniques. From motivational strategies to hands-on exercises, this modular course ensures participants are ready to inspire and support immigrants in their career journeys. The curriculum also leverages hybrid learning formats, combining digital and in-person training for maximum impact.

Through these initiatives, VET for NAI transforms traditional vocational guidance into an interactive, user-centric experience, fostering integration and empowerment.
